Introduction

The information contained in this package is designed to facilitate the readers' understanding of the capital requirements of TD Bank Group ("TD" or the "Bank"). This information should be used in conjunction with the Bank's first quarter 2025 Report to Shareholders, Earnings News Release, Investor Presentation, and the Supplemental Financial Information package, as well as the Bank's 2024 Annual Report. For Basel-related terms and acronyms used in this package, refer to the "Glossary – Basel" and "Acronyms" pages, respectively.

How the Bank Reports

The Bank prepares its Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board, the current generally accepted accounting principles, and refers to results prepared in accordance with IFRS as "reported" results. Certain comparative amounts have been revised to conform with the presentation adopted in the current period.

Information reported in the Supplemental Regulatory Disclosure are prepared in accordance with the Office of the Superintendent of Financial Institutions Canada's (OSFI's) Capital Adequacy Requirements (CAR), Leverage Requirements and Total Loss Absorbing Capacity (TLAC) guidelines. In addition, the disclosures are prepared in accordance with the Pillar 3, Capital Disclosure, Leverage Ratio Disclosure Requirements, and TLAC Disclosure Requirement guidelines.

As noted in the Pillar 3 disclosure Index on the following pages, the disclosures are grouped by topic. Of note, Credit Risk consists of credit risk exposures excluding counterparty credit risk (CCR) and includes drawn, undrawn and other off-balance sheet exposures whereas CCR includes repo-style transactions and derivative exposures. The glossary provides additional details of items included in these exposure types.

On February 1, 2023, OSFI implemented revised capital rules that incorporate the Basel III reforms with adjustments to make them suitable for domestic implementation. These revised rules include revisions to the calculation of credit risk and operational risk requirements, and revisions to the Leverage Requirements Guideline to include a requirement for Domestic Systemically Important Banks (D-SIBs) to hold a leverage ratio buffer of 0.50% in addition to the regulatory minimum requirement of 3.0%. This buffer will also apply to the TLAC leverage ratio supervisory target of 6.75%.

Pillar 3 Disclosure Requirements – In January 2015, the Basel Committee on Banking Supervision (BCBS) published the standard for the *Revised Pillar 3 Disclosure Requirements* (Revised Basel Pillar 3 standard). The Revised Basel Pillar 3 standard aim to address the problems identified through the financial crisis and to improve comparability and consistency of financial regulatory disclosures through more standardized formats between banks and across jurisdictions. Furthermore, OSFI issued the Pillar 3 Disclosure Requirements guideline April 2017, effective October 31, 2018 and subsequently issued the Pillar 3 Disclosure Guideline for Domestic Systemically Important Banks (D-SIBs) January 2022, effective February 1, 2023. The index below reflects the most recent updates and lists the location of the related disclosures presented in the first quarter 2025, Report to Shareholders (RTS), or Supplemental Financial Information (SFI), or Supplemental Regulatory Disclosures (SRD). Information on TD's website, SFI, and SRD is not and should not be considered incorporated herein by reference into the 2024 Annual Report, Management's Discussion and Analysis, or the Consolidated Financial Statements.

- ¹ Cross referenced to the Reconciliation with Balance Sheet Under Regulatory Scope of Consolidation table on page 5.
- The minimum CET1 requirement prior to the buffers is 4.5%.
- The Financial Stability Board (FSB), in consultation with BCBS and national authorities, has identified the 2025 list of G-SIBs, using 2024 fiscal year-end data. The Bank was identified as a G-SIB on November 22, 2019.

 The countercyclical buffer surcharge is in effect.

- Common equity capital G-SIB surcharge is in effect.
 Reflects Pillar 1 targets and does not include Pillar 2 domestic stability buffer. Effective November 1, 2023, the buffer is 3.5%.

⁷ On a stand-alone basis, TD Bank, N.A. reports regulatory capital to the Office of the Comptroller of the Currency on calendar quarter ends.

Flow Statement for Regulatory Capital¹

(\$ millions)

Common Equity Tier 1

Balance at beginning of period

New capital issues

Redeemed capital²

Gross dividends (deductions)

Shares issued in lieu of dividends (add back)

Profit attributable to shareholders of the parent company³

Removal of own credit spread (net of tax)

Movements in other comprehensive income

Currency translation differences

Available-for-sale investments

Financial assets at fair value through other comprehensive income

Other

Goodwill and other intangible assets (deduction, net of related tax liability)

Other, including regulatory adjustments and transitional arrangements

Deferred tax assets that rely on future profitability (excluding those arising from temporary differences)

Prudential valuation adjustments

Other

Balance at end of period

Additional Tier 1 Capital

Balance at beginning of period

New additional Tier 1 eligible capital issues

Redeemed capital

Other, including regulatory adjustments and transitional arrangements

Balance at end of period

Total Tier 1 Capital

Tier 2 Capital

Balance at beginning of period

New Tier 2 eligible capital issues

Redeemed capital

Amortization adjustments

Allowable collective allowance

Other, including regulatory adjustments and transitional arrangements

Balance at end of period

Total Regulatory Capital

TLAC Composition (TLAC1)

(\$ millions, except as noted)

Regulatory capital elements of TLAC and adjustments

Common Equity Tier 1 capital (CET1)

Additional Tier 1 capital (AT1) before TLAC adjustments

AT1 ineligible as TLAC as issued out of subsidiaries to third parties

AT1 instruments eligible under the TLAC framework (sum of lines 2 to 4)

Tier 2 capital (T2) before TLAC adjustments

Amortized portion of T2 instruments where remaining maturity > 1 year

T2 capital ineligible as TLAC as issued out of subsidiaries to third parties Other adjustments

T2 instruments eligible under the TLAC framework (sum of lines 6 to 9)

TLAC arising from regulatory capital (sum of lines 1, 5 and 10)

Non-regulatory capital elements of TLAC

External TLAC instruments issued directly by the bank and subordinated to excluded liabilities

External TLAC instruments issued directly by the bank which are not subordinated to excluded liabilities but meet all other TLAC term sheet requirements

Of which: amount eligible as TLAC after application of the caps

External TLAC instruments issued by funding vehicles prior to January 1, 2022

Eligible ex ante commitments to recapitalize a G-SIB in resolution

TLAC arising from non-regulatory capital instruments before adjustments (sum of lines 12, 13, 15 and 16)

Non-regulatory capital elements of TLAC: adjustments

TLAC before deductions (sum of lines 11 and 17)

Deductions of exposures between MPE resolution groups that correspond to items eligible for TLAC (not applicable to SPE G-SIBs and D-SIBs)1

Deduction of investments in own other TLAC liabilities

Other adjustments to TLAC

TLAC available after deductions (sum of lines 18 to 21)

Risk-weighted assets and leverage exposure measure for TLAC purposes

Total risk-weighted assets adjusted as permitted under the TLAC regime Leverage exposure measure

TLAC ratios and buffers

TLAC Ratio (as a percentage of risk-weighted assets adjusted as permitted under the TLAC regime) (line 22/line 23)

TLAC Leverage Ratio (as a percentage of leverage exposure) (line 22/line 24)

CET1 (as a percentage of risk-weighted assets) available after meeting the resolution group's minimum capital and TLAC requirements

Institution-specific buffer (capital conservation buffer plus countercyclical buffer plus

higher loss absorbency, expressed as a percentage of risk-weighted assets)

Of which: capital conservation buffer

Of which: bank specific countercyclical buffer

Of which: D-SIB / G-SIB buffer

¹ TLAC 2 is a G-SIB disclosure requirement to provide the ranking of the liability structure of all our material subsidiaries in foreign jurisdictions. TD Group US Holding LLC is the only material subsidiary entity for which TLAC 2 disclosure would be required at this time.

² Consistent with the scope of the Canadian statutory Bail-in Regime, Bail-in Debt is subordinated to Other Liabilities. Under the Bail-in Regime, Bail-in Debt which would ordinarily rank equally to Other Liabilities in liquidation, is subject to conversion under statutory resolution powers whereas Other Liabilities are not subject to such conversion.

³ Completion of this column is not required by OSFI at this time.

Minimum capital requirements equal 8% of RWA.
 Includes other assets and equities which use a regulatory prescribed risk weight.
 Includes qualifying central counterparties (QCCPs) and repo style transactions.
 Effective the first quarter of 2024, the Fundamental Review of Trading Book (FRTB) was implemented for market risk and CVA.

Non-

- Non-counterparty credit risk includes loans and advances to individuals and small business retail customers, wholesale and commercial corporate customers, and banks and governments, as well as holdings of debt, equity securities, and other assets including prepaid expenses, deferred income taxes, land, building, equipment, and other depreciable property.
- Reflects Pillar 3 requirements for RWA flow statements of credit risk exposures under IRB (CR8) which excludes securitization and equity.
- 3 CCR is comprised of over-the-counter (OTC) derivatives, repo-style transactions, trades cleared through central counterparties, and CVÁ RWA.
- The Asset size category consists of organic changes in book size and composition (including new business and maturing loans) and, for the first quarter of 2025, the non-counterparty credit RWA decreased in various portfolios within the U.S. Retail Segment partly offset by an increase in the Canadian Personal and Commercial Banking Segment. The increase in counterparty credit risk was within Wholesale Banking.
- The Asset quality category includes quality of book changes caused by experience such as underlying customer behaviour or demographics, including changes through model calibrations/realignments and, for the first quarter of 2025, the increase in non-counterparty credit risk RWA is spread across various segments.
- The Model updates category relates to model implementation, changes in model scope, or any changes to address model malfunctions.
- The Methodology and policy category impacts reflect newly adopted methodology changes to the calculations driven by regulatory policy changes, such as new regulations.
- * The Acquisitions and disposals category reflects changes due to business acquisitions or disposals.
- 9 Foreign exchange movements mainly reflect a change in the U.S. dollar foreign exchange rate for the U.S. portfolios mostly in the U.S. Retail and Wholesale Banking segments.
- The Other category consists of items not described in the above categories, such as prepaid expenses, deferred income taxes, land, building, equipment and other depreciable property, and other assets.

¹ The Movement in risk levels category reflects changes in risk due to position changes and market movements.

² The Model updates category reflects updates to the model to reflect recent experience and change in model scope.

The Methodology and policy category reflects newly adopted methodology changes to the calculations driven by regulatory policy changes.

⁴ The Acquisition and disposals category reflects changes due to business acquisitions or disposals.

⁵ Foreign exchange movements and other are deemed not meaningful (n/m) since RWA exposure measures are calculated in Canadian Dollars. Therefore, no foreign exchange translation is required.

¹ The Business growth category reflects changes in the three-year average Business Indicator (BI); a financial proxy measure for operational risk exposure used in Basel III Standardized Approach (SA).

² The Methodology and policy category reflects newly adopted methodology changes to the calculations driven by regulatory policy changes.

³ The Acquisitions and disposals category reflects changes due to business acquisitions or disposals.

⁴ The Movement in risk level category reflects changes in the ten-year average operational loss experience (reported on a one-quarter lag) relative to BI.

¹ Gross credit risk exposure is before credit risk mitigants. This table excludes securitization, equity, and other credit RWA.
² Gross exposure on undrawn commitments is EAD which is the amount currently undrawn but expected to be drawn assuming a default on the underlying committed loan agreement.

Excludes securitization and CCR.

Credit conversion factor.

RWA calculated on post-CCF and post-CRM exposures.

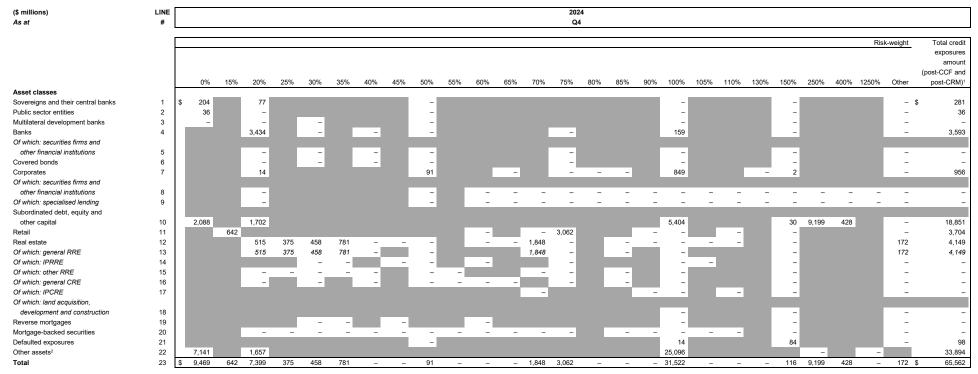

Total RWA as a percentage of post-CCF and post-CRM exposures.

Excludes exposures subject to direct capital deductions and threshold deductions.

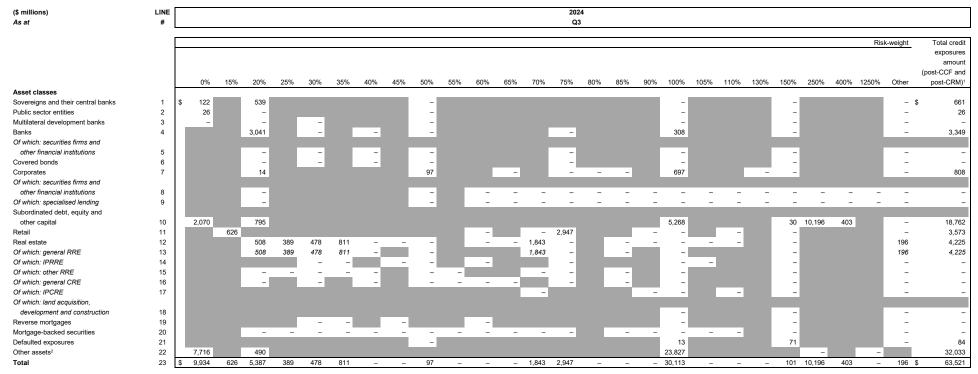

¹ Total credit exposure amount (post-CCF and post-CRM): the amount used for the capital requirements calculation (for both on- and off-balance sheet amounts), therefore net of specific provisions (including partial write-offs) and after CRM techniques and CCF have been applied but before the application of the relevant risk weights.

² Excludes exposures subject to direct capital deductions and threshold deductions.

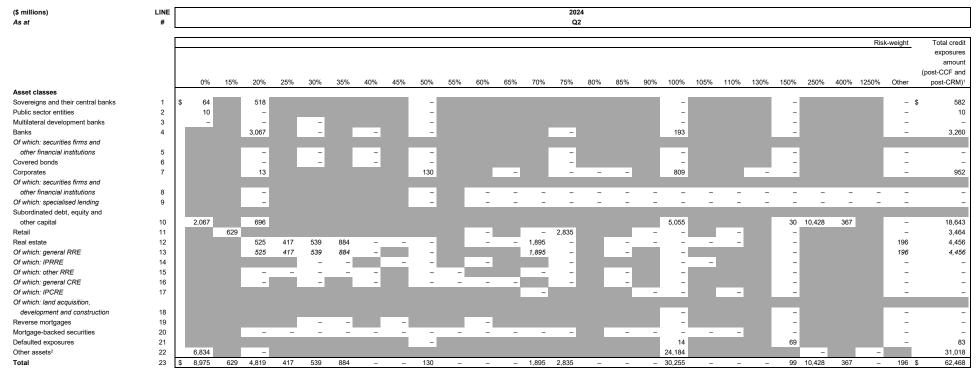

¹ Total credit exposure amount (post-CCF and post-CRM): the amount used for the capital requirements calculation (for both on- and off-balance sheet amounts), therefore net of specific provisions (including partial write-offs) and after CRM techniques and CCF have been applied but before the application of the relevant risk weights.

² Excludes exposures subject to direct capital deductions and threshold deductions.

1,382

Excludes counterparty exposures (derivative and repo-style transactions).
 Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

Exposures based on obligors prior to CRM.

⁴ Exposures after CRM reflecting guarantor.

Total number of obligors is total number of unique borrowers and may not add as certain borrowers may be represented in more than one PD scale.

⁶ Total RWA to post-CRM EAD.

Includes Canadian Personal and Commercial Banking, Wealth Management and Insurance, Wholesale Banking and Corporate segments.

Excludes counterparty exposures (derivative and repo-style transactions).

Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

Exposures based on obligors prior to CRM.

Exposures after CRM reflecting guarantor.

⁵ Total number of obligors is total number of unique borrowers and may not add as certain borrowers may be represented in more than one PD scale.

Total RWA to post-CRM EAD

Includes Canadian Personal and Commercial Banking, Wealth Management and Insurance, Wholesale Banking and Corporate segments.

¹ As of the second quarter 2023, the sovereign disclosure includes all public sector entities. Previously, these exposures may have resided across various asset classes.

² Excludes CCR exposures (derivative and repo-style transactions).
3 Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.
4 Exposures based on obligors prior to CRM.

⁵ Exposures after CRM reflecting guarantor.

Total number of obligors is total number of unique borrowers and may not add as certain borrowers may be represented in more than one PD scale.
 Total RWA as a percentage of post-CRM EAD.

⁸ Includes residential secured government insured exposures (CMHC). For pre-CRM, these are included under Residential secured – insured.

¹ Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

² Exposures based on obligors prior to CRM.

³ Exposures after CRM reflecting guarantor.

⁴ Number of retail accounts.

⁵ Average maturity is not used in the calculation of retail exposure RWA.

⁶ Total RWA as a percentage of post-CRM EAD.

⁷ Includes residential mortgages and home equity lines of credit (HELOCs). Insured classification reflects when insurance on the exposure is used for CRM for reduction of RWA.

⁸ Includes government insured exposures (CMHC) and exposures insured by corporate entities. For post-CRM, government insured exposures are included in Sovereign.

⁹ Includes Canadian Personal and Commercial Banking, Wealth Management and Insurance, Wholesale Banking and Corporate segments.

¹ Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

² Exposures based on obligors prior to CRM.

³ Exposures after CRM reflecting guarantor.

⁴ Number of retail accounts.

⁵ Average maturity is not used in the calculation of retail exposure RWA.

⁶ Total RWA as a percentage of post-CRM EAD.

⁷ Includes residential mortgages and home equity lines of credit (HELOCs). Insured classification reflects when insurance on the exposure is used for CRM for reduction of RWA.

Includes government insured exposures (CMHC) and exposures insured by corporate entities. For post-CRM, government insured exposures are included in Sovereign.

⁹ Includes Canadian Personal and Commercial Banking, Wealth Management and Insurance, Wholesale Banking and Corporate segments.

¹ Collateral held under a Credit Support Annex (CSA) to help reduce CCR is in the form of high-quality and liquid assets such as cash and high-quality government securities. Acceptable collateral is governed by the Collateralized Trading Policy.
2 Derivatives executed through a central clearing house reduces settlement risk due to the ability to net settle offsetting positions for capital purposes and therefore receive preferential capital treatment compared to those settled with non-central clearing house counterparties.

¹ Non-trading credit derivatives, which are given financial guarantee treatment for credit risk capital purposes, were excluded in accordance with OSFI's guidelines.

² RWA for OSFI "deemed" QCCP derivative exposures are calculated in accordance with the Basel III regulatory framework, which takes into account both trade exposures and default fund exposures relating to derivatives, are presented based on the "all-in" methodology. The amounts calculated are net of master netting agreements and collateral.

^{1.45} Estimated PD reflects a one-year through-the-cycle time horizon and is based on long run economic conditions.
 Average Estimated PD and Actual Default Rate are weighted by account.
 Estimated LGD reflects loss estimates for the full portfolio under a severe downturn economic scenario.

⁴ Represents average LGD of the impaired portfolio over trailing 12 months.

Represents actual defaults over trailing 12 months.

Represents actual defaults over trailing 12 months.

LGD for the residential secured insured portfolio is n/a due to the effect of CRM from government backed entities.

Countercyclical Capital Buffer (CCB)

- Used in the calculation of risk-based capital ratios, total risk-weighted assets are calculated for credit, operational, and market risks using the approaches
 described below
- Under this approach, banks apply a standardized set of risk-weights to exposures, as prescribed by the regulator, to calculate credit risk capital requirements.

 Standardized risk-weights are based on external credit assessments, where available, and other risk-related factors, including exposure asset class and collateral.
- Under this approach, banks use their own internal historical experience of PD, LGD, EAD, and other key risk assumptions to calculate credit risk capital
 requirements. Use of the AIRB approach is subject to supervisory approval.
- Under this approach, banks use their own internal historical experience of PD and supervisory prescribed LGD and EAD, and other key risk assumptions to calculate credit risk capital requirements. Use of the FIRB approach is mandated for certain asset classes (large corporates, banks and securities firms).
- The SAOR consists of two main components a Business Indicator Component (BIC) (a measure of a bank's income) and a Loss Component (LC), from which an Internal Loss Multiplier (ILM) is derived (a measure of a bank's historical losses). Operational risk capital is the product of the BIC and the ILM, with risk-weighted assets for operational risk being this capital requirement multiplied by 12.5.
- Under this approach, banks use standardized capital charges prescribed by the regulator to sum the capital requirement under the sensitivities-based method (including delta, vega, and curvature risk), the default risk capital and the residual risk add-on.
- Under this approach, banks use their own internal risk management models to calculate specific risk and general market risk charges.
- The total amount the Bank is exposed to at the time of default measured before counterparty-specific provisions or write-offs. Includes exposures under both the Standardized and AIRB approaches to credit risk.
- Includes general and income producing residential mortgages and home equity lines of credit extended to individuals.
- Includes credit cards, unsecured lines of credit, and overdraft protection products extended to individuals.
- QRR is further split into transactors and revolvers. Transactors are obligors in relation to facilities with an interest free grace period where the accrued interest
 over the previous 12 months is less than \$50 or obligors in relation to overdraft facilities or lines of credit where there has been no drawdowns over the previous
 12 months. Revolvers are obligors in relation to the same credit products that do not meet the conditions to be classified as transactors.
- Includes all other loans (such as personal loans, student lines of credit, and small business loans) extended to individuals and small businesses.
- Includes exposures to corporations, partnerships, or proprietorships.
- · Includes exposures to central governments, central banks, multilateral development banks, and public sector entities.
- Includes exposures to deposit-taking institutions, securities firms, and other financial institutions.
- The amount of funds advanced to a borrower.
- The difference between the authorized and drawn amounts (for instance, the unused portion of a line of credit/committed credit facility).
- Repurchase and reverse repurchase agreements, securities borrowing and lending.
- Privately negotiated derivative contracts.
- All off-balance sheet arrangements other than derivatives and undrawn commitments (such as letters of credit, letters of guarantee).
- The likelihood that the borrower will not be able to meet its scheduled repayments within a one year time horizon.
- The total amount the Bank is exposed to at the time of default.
- The amount of the loss when a borrower defaults on a loan, which is expressed as a percentage of EAD.
- CVA represents a capital charge that measures credit risk due to default of derivative and securities financing transaction counterparties. This charge requires banks to capitalize for the potential changes in counterparty credit spreads and market risk factors that drive prices of derivative transactions and securities financing transactions.
- This is a primary Basel III capital measure comprised mainly of common equity, retained earnings and accumulated other comprehensive income (loss).
 Regulatory deductions made to arrive at the CET1 Capital include, goodwill and intangibles, unconsolidated investments in banking, financial, and insurance entities, deferred tax assets, defined benefit pension fund assets, and shortfalls in allowances.
- . CET1 ratio represents the predominant measure of capital adequacy under Basel III and equals CET1 Capital divided by RWA.
- Net income available to common shareholders as a percentage of average RWA.
- LCR is calculated by dividing the total stock of unencumbered high-quality liquid assets by the expected next 30-day stressed cash outflow.
- CCB is an extension of the capital conservation buffer which takes into account the macro-financial environment in which the banks operate and aims to protect the
 banking sector against future potential losses during periods of excess aggregate credit growth from a build-up of system-wide risk. The Bank's CCB will be a
 weighted average of the buffers deployed across jurisdictions to which the institution has private sector credit exposures.
