## For the 1st Quarter ended January 31, 2009

## How the Bank Reports

 "reported" results. The Bank also utilizes non-GAAP financial measures referred to as "adjusted" results to assess each of its businesses and to measure overall Bank performance. To arrive at adjusted results, the Bank removes "items of note", net of income taxes, from reported results. The items of note relate to items which management does not believe are indicative of underlying
 Bank's performance.

 of the Bank's Q1 2009 Report to Shareholders.

## Segmented I nformation

 Management, including TD AMERITRADE Holding Corporation (TD Ameritrade); U.S. Personal and Commercial Banking through TD Banknorth, Inc. (TD Banknorth) and Commerce Bancorp, Inc. (Commerce), operating under the brand name TD Bank, America's Most Convenient Bank; and Wholesale Banking. The Bank's other activities are grouped into the Corporate segment.
 business segment reflect revenue, expenses, assets and liabilities generated by the businesses in that segment. Due to the complexity of the Bank, its management reporting model uses various estimates, assumptions, allocations and risk-based methodologies for funds transfer pricing, inter-segment revenue, income tax rates, capital, indirect expenses and cost transfers to measure
 the distributing segment. Income tax expense or benefit is generally applied to each segment based on a statutory tax rate and may be adjusted for items and activities unique to each segment.
 is adjusted net income available to common shareholders, less a charge for average invested capital. Each segment's invested capital represents the capital required for economic risks, including credit, market and operational risks, plus the purchased amounts of goodwill and intangible assets, net of impairment write downs. Return on invested capital is adjusted net income available to

 a more meaningful comparison of net interest income with similar institutions. The TEB adjustment, reflected in the Wholesale Banking segment, is eliminated in the Corporate segment.
 are accounted for as sales. For the purpose of segmented reporting, Canadian Personal and Commercial Banking accounts for the transactions as though they are financing arrangements. Accordingly, the interest income earned on the assets sold net of the funding costs incurred by the purchaser trusts is recorded in net interest income and the provision for credit losses related to these assets is charged to provision for (reversal of) credit losses. This accounting is reversed in the Corporate segment and the gain recognized on sale which is in compliance with appropriate accounting standards together with income earned on the retained interests net of credit losses incurred are included in other income.

For more information, see the "Business Focus" section of the 2008 MD\&A and Note 30 to the 2008 audited Consolidated Financial Statements.

${ }^{1}$ On January 1, 2007, TD Banknorth completed the acquisition of Interchange Financial Services Corporation (Interchange). On April 20, 2007, the Bank completed the privatization of TD Banknorth. Effective Q3 2007, results of TD Bank USA, N.A. (TD Bank USA), previously reported in the Corporate segment, are included in the U.S. Personal and Commercial Banking segment (U.S. P\&C) prospectively. On March 31, 2008, the Bank completed the acquisition of Commerce. Effective Q3 2008, the U.S. insurance and credit card businesses were included in the Canadian Personal and Commercial Banking segment, and the U.S. Wealth Management businesses were included in the Wealth Management segment, net of distribution commissions to U.S. P\&C; Prior periods were not reclassified as the impact was not material to segment results.
${ }^{2}$ TD Bank's financial results are reflected in U.S. P\&C on a one month lag, except that reported non-interest expenses for Q2 2007 and Q2 2008 included restructuring charges incurred in April 2007, and restructuring and integration charges incurred in April 2008, respectively.
${ }^{3}$ Items of note relate primarily to restructuring and integration charges recorded in connection with mergers and acquisitions. See footnotes 5 and 6 on page 43 .
${ }^{4}$ The rate charged for invested capital is $9.5 \%$ in 2009, $9.0 \%$ in 2008 and $9.0 \%$ in 2007
${ }^{5}$ This represents RWA as at the end of the Bank's fiscal period.
${ }^{6}$ Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I.
${ }^{7}$ For regulatory purposes only, effective Q4 2008, the one month lag in reporting TD Banknorth and Commerce assets is eliminated by using the same period end as the rest of the Bank.
${ }^{8}$ Average deposits and margin on average earning assets exclude the impact related to the money market deposit account (MMDA) agreement with TD Ameritrade. The MMDA is described in Note 30 of our 2008 audited Consolidated Financial Statements.
${ }^{9}$ Includes full service retail banking stores
U.S. Personal and Commercial Banking (U.S. P\&C) comprises the Bank's U.S.-based retail and commercial banking operations. Distribution commissions are paid to U.S. P\&C for U.S. activities reported in the Canadian Personal and Commercial Banking and Weath Management segments. The Bank's operations provide a full range of financial products and services through multiple delivery channels, including a network of over 1,000 branches located primarily in the Northeast and Mid-Atlantic regions of the U.S. and Florida, telephone and internet banking and automated banking machines, allowing customers to have banking access virtually anywhere and anytime. U.S. P\&C also serves the needs of businesses, customizing a broad range of products and services to meet their financing, investment, cash management, international trade and day-to-day banking needs.

${ }^{1}$ Provision for credit losses includes the cost of credit protection incurred in hedging the lending portfolio.
The rate charged for invested capital in 2009 is $13.0 \%$. Prior to 2009 , the rates were $11.5 \%$.
Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I.
${ }^{4}$ Defined as gross loans and bankers' acceptances, excluding letters of credit and before any cash collateral, credit default swap, reserves, etc.
${ }^{5}$ Includes trading-related income reported in net interest income (line 1) and other income (line 2).

[^2]

 permit the reclassification of financial assets out of trading and available-for-sale categories in specified circumstances. During Q4 2008, the Bank changed its investment strategy with respect to certain trading debt securities. These debt securities were previously recorded at fair value with changes in fair value, as well as any gains or losses realized on disposal, recognized in trading income. Since the Bank no longer intends
 other comprehensive income. For details, see Notes 1 and 2 to the Bank's 2008 audited Consolidated Financial Statements.

Gross credit risk exposures

${ }^{1}$ Gross credit risk exposures are pre-credit risk mitigants. This table excludes securitization and equity exposures.
${ }^{2}$ Residual contractual maturity is the remaining term to maturity of an exposure.

${ }^{1}$ The actual loss rate for Retail represents the actual write-offs net of recoveries divided by the outstanding balances taken at the beginning of the 4 -quarter period starting 15 months ago. This reflects the 3-month lag between the Basel II definition of default (at 90 days past due) and write-off (at 180 days). The actual loss rate for non-retail represents the specific provisions net of reversals/recoveries divided by the outstanding balances for the same period. Actual loss rate is provided on a rolling 4-quarter basis, including the current and prior three quarters.
${ }^{2}$ The expected loss rate represents the loss rate that was predicted at the beginning of the applicable 4-quarter period defined in footnote 1 . The expected loss is measured using Basel II parameters (PDxLGDxEAD) divided by outstanding balances at the beginning of the 4-quarter period.
${ }^{3}$ The historical loss rate equals total actual losses for all years in the historically measured period divided by total outstanding balances for all years in the historically measured period. Currently, the Bank includes comparable data from fiscal 2002 through to the current year in the historicaly measured period. This historical data will be updated annually until a complete business cycle is included in the historically measured period. A business cycle is estimated to be $10-15$ years in duration
${ }^{4}$ Expected loss rate models for Qualifying revolving retail exposures were updated in Q1 2009 to reflect the most current available data.

## Commentary:

Actual loss rates for the 4 quarters ending Q1 2009 were lower than expected loss rates for the same period.
We expect to see a difference between the rolling 4 quarter actual loss rates and expected loss rates for the following reasons:
_ Expected losses are calculated using "through the cycle" risk parameters while actual losses are determined at a "point in time" and reflect economic conditions at that time. Using "through the cycle" parameters has the effect of stabilizing expected losses over a longer period of time. As a result, actual losses may exceed expected losses during a recession and may fall below expected losses during economic growth.

- Expected loss parameters are conservatively estimated (i.e. adjusted upwards) to account for the limited number of years of historical data available(i.e. not yet a full business cycle). - LGD parameters used in the expected loss estimates are adjusted upwards to reflect potential economic downturn conditions.

To ensure our models and risk parameters continue to be reasonable predictors of potential loss, we assess and review our risk parameters against actual loss experience and public sources of information at least annually and we update our models as required.
There was no material change in actual loss rates or the underlying factors (default rate, LGD, EAD) for both Retail and Non-retail exposures in the 4 quarters ending Q1 2009 vs. the 4 quarters ending Q4 2008.
For Qualifying revolving retail and Other retail exposures, default rates and LGD were higher in the 4 quarters ending Q1 2009 than they were during the historically measured period, which was characterized by historically favourable economic conditions. As a result, actual loss rate in the 4 quarters ending Q1 2009 was higher than the historical actual loss rate.
For Corporate exposures, the historical actual loss rate was impacted by the significant sectoral provisions taken in 2002. This contributed to higher default rates and LGD than we are currently experiencing. As a result, actual loss rate in the 4 quarters ending Q1 2009 was lower than the historical actual loss rate

In accordance with CICA Handbooks. 3860 , the Bank is required to classity certain classes of preferred shares and innovative Tier 1 capital investments as liabilites on the balance sheet. For reguatory capital purposes, these capital instruments have been grandfathered by osf and continue to be included in Tier 1 capital.
When expected loss as calculated within the IRB approach exceeds total provisions, the difference is deducted $50 \%$ from Tier 1 capital and $50 \%$ from Tier 2 capital. When expected loss as calculated within the IRB approach is less than the total provisions, the difiference is added to tier 2 capital.
 substantial investments and insurance, respectively. Increases in the investment value of insurance subsidiaries and / or substantial investments on or atter January 1,2007 are subject to the $50 \%$ from Tier 1 capital and $50 \%$ from Tier 2 capital deduction.
OSF''s target total capital ratio for Canadian banks is $10 \%$.
On a stand-alone basis, TD Bank, N.A., TD Banknorth, N.A. and Commerce Bank, N.A. report regulatory capital to the Office of the Comptroller of the Currency (OCC) under Basel I. The disclosed capital ratios are based on this framework.
Commerce Bank, N.A. and Commerce Bank/North merged into TD Banknorth, N.A. on May 31, 2008. On the same date, TD Banknorth, N.A. changed its legal name to TD Bank, N.A.
As the Bank is not the primary beneficiary of $T D$ Capital Trust II and IV, these are not consolidated by the Bank. However they do qualify as Tier 1 regulatory capital.

## Risk-weighted Assets

Risk-weighted assets (RWA)

- Used in the calculation of risk-based capital ratios. Risk-weighted assets (RWA) are calculated by applying a risk-weight factor ("risk-weight") to the notional amount of each asset. Off-balance sheet amounts are converted to balance sheet (or credit) equivalent amounts using credit conversion factors, before the appropriate risk-weight is applied. The risk-weight is determined by the regulatory approach used.

## Approaches used by the Bank to calculate RWA:

## For Credit Risk

Standardized Approach

Advanced Internal Ratings Based (AIRB) Approach
For Operational Risk
Basic Indicator Approach
Standardized Approach

For Market Risk
Internal Models Approach

## Credit Risk Terminology

Gross credit risk exposure

## Counterparty Type I Exposure Classes

 RetailResidential secured
Qualifying revolving retail (QRR)
Other retail
Non-retail
Corporate
Sovereign
Bank
Exposure Types:
Drawn
Undrawn (commitment)
Repo-style transactions
OTC derivatives
Other off-balance sheet

## AIRB Credit Risk Parameters:

Probability of Default (PD)
Exposure at Default (EAD)
Loss Given Default (LGD)

- Under this approach, banks use a standardized set of risk-weights as prescribed by the regulator to calculate credit risk capital requirements. Standardized risk-weights are based on external credit assessments, where available, and other risk-related factors, including exposure asset class, collateral, etc.
- Under this approach, banks use their own internal historical experience of PD, LGD, EAD and other key risk assumptions to calculate credit risk capital requirements. Use of the AIRB approach is subject to supervisory approval.
- Under this approach, banks calculate operational risk capital requirements by applying a prescribed factor of $15 \%$ to a three-year average of positive annual gross income
- Under this approach, banks apply prescribed risk-weight factors to a three-year average of annual gross income for each of eight different business lines, representing the different activities of the institution (e.g. Corporate Finance, Retail Banking, Asset Management, etc.).
- Under this approach, banks use their own internal risk management models to calculate specific risk and general market risk charges.
- The total amount we are exposed to at the time of default measured before specific provisions or write-offs. Includes exposures under both the Standardized and AIRB approach to credit risk.
- Includes residential mortgages and home equity lines of credit extended to individuals.
- Includes credit cards, unsecured lines of credit and overdraft protection products extended to individuals (in the case of the Standardized Approach to credit risk, credit card exposures are included in the 'Other retail' category).
- Includes all other loans (e.g. personal loans, student lines of credit and small business loans) extended to individuals and small businesses.
- Includes exposures to corporations, partnerships or proprietorships.
- Includes exposures to central governments, central banks, multilateral development banks and certain public sector entities.
- Includes exposures to deposit-taking institutions, securities firms and certain public sector entities.
- The amount of funds advanced to a borrower.
- The difference between the authorized and drawn amounts (e.g. the unused portion of a line of credit / committed credit facility).
- Repurchase and reverse repurchase agreements, securities borrowing and lending.
- Privately negotiated derivative contracts that are not exchange-traded.
- All off-balance sheet arrangements other than derivatives and undrawn commitments (e.g. letters of credit, letters of guarantee).
- The likelihood that the borrower will not be able to meet its scheduled repayments within a one year time horizon
- The total amount we are exposed to at the time of default.
- The amount of the loss when a borrower defaults on a loan, which is expressed as a percentage of exposure at default (EAD)
${ }^{1}$ The adjustment for items of note, net of income taxes, is removed from reported results to compute adjusted results.
${ }^{2}$ The Enron contingent liability for which the Bank established a reserve was re-evaluated in light of the favourable evolution of case law in similar securities class actions following the U.S. Supreme Court's ruling in Stoneridge Partners, LLC v. Scientific-Atlanta, Inc. Effective October 31, 2008, the Bank recorded an after-tax positive adjustment of $\$ 323$ million ( $\$ 477$ million before tax), reflecting the substantial reversal of the reserve. For details, see Note 28 to the 2008 audited Consolidated Financial Statements.
${ }^{3}$ Effective August 1, 2008, as a result of recent deterioration in markets and severe dislocation in the credit market, the Bank changed its trading strategy with respect to certain trading debt securities. The Bank no longer intends to actively trade in these debt securities. Accordingly, the Bank reclassified certain debt securities from trading to available-for-sale category in accordance with the Amendments to CICA Section 3855, Financial Instruments - Recognition and Measurement. As part of the Bank's trading strategy, these debt securities are economically hedged, primarily with credit default swaps (CDS) and interest rate swap contracts. This includes foreign exchange translation exposure related to the debt securities portfolio and the derivatives hedging it. These derivatives are not eligible for reclassification and are recorded on a fair value basis with changes in fair value recorded in the period's earnings. Management believes that this asymmetry in the accounting treatment between derivatives and the reclassified debt securities results in volatility in earnings from period to period that is not indicative of the economics of the underlying business performance in the Wholesale Banking segment. As a result, the derivatives are accounted for on an accrual basis in Wholesale Banking segment and the gains and losses related to the derivatives in excess of the accrued amounts are reported in the Corporate segment and disclosed as an item of note. Adjusted results of the Bank exclude the gains and losses of the derivatives in excess of the accrued amount.
${ }^{4}$ As part of the global restructuring of Visa USA Inc., Visa Canada Association and Visa International Service Association, which closed on October 3, 2007 (restructuring date), the Bank received shares of the new global entity (Visa Inc.) in exchange for the Bank's membership interest in Visa Canada Association. As required by the accounting standards, the shares the Bank received in Visa Inc. were measured at fair value and an estimated gain of $\$ 135$ million after tax was recognized in the Corporate segment, based on results of an independent valuation of the shares.
${ }^{5}$ The TD Banknorth restructuring, privatization and merger-related charges include the following: $\$ 39$ million TD Banknorth restructuring, privatization and merger-related charges included in U.S. Personal and Commercial Banking (which included the following: $\$ 31$ million restructuring charge, primarily consisted of employee severance costs, the costs of amending certain executive employment and award agreements and write-down of long-lived assets due to impairment; $\$ 5$ million privatization charges, which primarily consisted of legal and investment banking fees; and $\$ 3$ million merger-related charges related to conversion and customer notices in connection with the integration of Hudson United Bancorp and Interchange with TD Banknorth. In the Consolidated Statement of Income, the restructuring charges are included in the restructuring costs while the privatization and merger-related charges are included in other non-interest expenses); and $\$ 4$ million restructuring charge related to the transfer of functions from TD Bank USA to TD Banknorth, included in the Corporate segment.
${ }^{6}$ As a result of the acquisition of Commerce and related restructuring and integration initiatives undertaken, the Bank incurred restructuring and integration charges. Restructuring charges consisted of employee severance costs, the costs of amending certain executive employment and award agreements and the write-down of long-lived assets due to impairment. Integration charges consisted of costs related to employee retention, external professional consulting charges and marketing (including customer communication and rebranding). In the Interim Consolidated Statement of Income, the restructuring and integration charges are included in non-interest expenses. The items of note include the following: Q2 2008: \$30 million restructuring and integration charges; Q3 2008: \$15 million integration charges; and as a result of the Commerce acquisition, the combined overall tax rate for U.S. Personal and Commercial Banking declined, resulting in a negative impact on the future income tax assets of $\$ 14$ million related to non-intangible future tax assets; Q4 2008: \$25 million integration charges; and Q1 2009: \$67 million restructuring and integration charges.
${ }^{7}$ The Bank purchases CDS to hedge the credit risk in Wholesale Banking's corporate lending portfolio. These CDS do not qualify for hedge accounting treatment and, therefore, they are measured at fair value with changes in fair value recognized in current period's earnings. The related loans are accounted for at amortized cost. Management believes that this asymmetry in the accounting treatment between CDS and loans would result in periodic profit and loss volatility which is not indicative of the economics of the corporate loan portfolio or the underlying business performance in Wholesale Banking. As a result, the CDS are accounted for on an accrual basis in Wholesale Banking and the gains and losses on the CDS, in excess of the accrued cost, are reported in the Corporate segment. Adjusted earnings excludes the gains and losses on the CDS in excess of the accrued cost. When a credit event occurs in the corporate loan book that has an associated CDS hedge, the provision for credit losses (PCL) related to the portion that was hedged via the CDS is netted against this item of note. During Q1 2008, the change in the fair value of CDS, net of PCL, resulted in a net gain of $\$ 38$ million before tax ( $\$ 25$ million after tax). The item of note included a change in fair value of CDS of $\$ 55$ million before tax ( $\$ 36$ million after tax), net of PCL of approximately $\$ 17$ million before tax ( $\$ 11$ million after tax).
${ }^{8}$ This represents the negative impact of the scheduled reductions in the income tax rate on reduction of net future income tax assets.
${ }^{9}$ The provision for insurance claims related to a court decision in Alberta. The Alberta government's legislation effectively capping minor injury insurance claims was challenged and held to be unconstitutional.
While the Government of Alberta has appealed the decision, the ultimate outcome remains uncertain. As a result, the Bank accrued an additional actuarial liability for potential losses in the first quarter of 2008.
${ }^{10}$ EPS impact is computed by dividing items of note by the weighted-average number of shares outstanding during the period. As a result, the sum of the quarterly EPS impact may not equal the year-to-date EPS impact.
${ }^{11}$ The diluted earnings per share figures do not include Commerce earnings for the month of April 2008 because there is a one month lag between fiscal quarter ends, while share issuance on close resulted in a one-time negative earnings impact of 4 cents per share.

[^0]:    Certain comparative amounts have been reclassified to conform with current period presentation

[^1]:    
     branches located primarily in the Northeast and Mid-Atlantic regions of the U.S. and Florida, telephone and internet banking and automated banking machines, allowing customers to have banking access virtually anywhere and anytime. U.S. P\&C also serves the needs of businesses, customizing a broad range of products and services to meet their financing, investment, cash management, international trade and day-to-day banking needs.

[^2]:    Wholesale Banking serves a diverse base of corporate, government and institutional clients in key financial markets around the world. Under the TD Securities brand, Wholesale Banking provides a wide range of
     trading and investment needs.

[^3]:    ${ }^{1}$ These gains (losses) are on instruments managed within Wholesale Banking's trading portfolios.
    
     income. The swaps did not exist prior to Q4 2007. Due to the immaterial nature of the mark-to-market income in prior quarters, no retroactive reclassification was made.

[^4]:    ${ }^{1}$ Including Small Business Banking.
    The quarter-over-quarter increase in Q1 2008 was largely a result of a change in the definition of gross impaired loans for insured residential mortgages from 360 days to 90 days past the contractual due date. There was an insignificant impact on specific allowances as a majority of the net increase in gross impaired balances related to residential mortgages that are insured.
    ${ }^{3}$ Q2 2008 included Cdn $\$ 97$ million of impaired loans due to the Commerce acquisition. All loans acquired from Commerce have been measured at fair value. Fair value takes into consideration the credit quality of the loans and as a result,
    no allowance was recognized upon acquisition.
    ${ }^{4}$ Includes a small portion of personal and commercial loans booked in U.S. entities, but managed by the Canadian Personal and Commercial Banking segment.
    ${ }^{5}$ Includes customers' liability under acceptances.

[^5]:    ${ }^{1}$ Premiums on credit default swaps (CDS) recorded in provision for credit losses for Wholesale Banking are reclassified to trading income in the Corporate segment.

[^6]:    Gross credit risk exposures are pre-credit risk mitigants. This table excludes securitization and equity exposures.
    Residual contractual maturity is the remaining term to maturity of an exposure.
    ${ }^{3}$ A significant portion of the $\$ 43.2$ billion increase in credit risk exposures in Q2 2008 was due to the Commerce acquisition, which represented $\$ 30.3$ billion of this increase

[^7]:    ${ }^{1}$ For exposures under the Standardized Approach, eligible financial collateral can include cash, gold, highly rated debt securities and equities listed on the main index.
    ${ }^{2}$ For exposures under the AIRB approach, eligible financial collateral is taken into account in the Bank's Loss Given Default (LGD) models. Separate disclosure of eligible financial collateral is, therefore, not required.

[^8]:    ${ }^{1}$ Notional undrawn commitments are equal to the contractually available amounts provided via committed loan agreements less amounts currently outstanding under those committed loan agreements. ${ }^{2}$ EAD on undrawn commitments is the amount currently undrawn but expected to be drawn assuming a default on the underlying committed loan agreement

[^9]:    ${ }^{1}$ Securitization exposures include the Bank's exposures as originator and investor under both the Internal Ratings Based approach and the Standardized approach
    ${ }^{2}$ Securitization exposures deducted $50 \%$ from Tier 1 capital and $50 \%$ from Tier 2 capital.
    ${ }^{3}$ Gain on sale recorded upon securitization deducted from Tier 1 capital.
